

# Vehicle Cleaning Instructions

A clean work area promotes a healthy environment. You have a role in keeping your work area clean and safe. If you share a work vehicle with others, sanitize high-touch areas every time you take over the vehicle.

Follow these three easy steps:

- ① Apply a sanitizing solution to a disposable cloth or use an antibacterial wipe (eg. Lysol wipe) to wipe down the following:
  - steering wheel
  - door handles
  - seatbelt clasp
  - all other areas that are commonly touched
- ② Carefully dispose of the cloth immediately after use.
- ③ Wash your hands with soap and water or an alcohol-based hand sanitizer.
